Vue explanation and reflection:

Vue was an excellent skill to learn as an aspect of JavaScript. The value concepts and ideas were very enjoyable to implement into my codes and to test and learn how to use them. The value concepts I used in my code were V-for, V-else, V-show, as well as V-else if, and also V-if with V-show. These were displayed in a table on my first website showing the functionality of the site as well as the To do list.

Website 1:

All aspects of the website excluding the table used vue.js

This is my page that displays my use of Vue concepts, the pink box around this text is one example!
Message: [   ]

Message: Hello, Vue!

Directive	Example
v-show	**Hello! Welcome to my page**
v-if with v-for	
v-else-if, v-else	
v-for	1. Basketball 2. Baseball 3. Football 4. Footy 5. NFL 6. Volleyball 7. Badminton
Multiple v-for	0: "Basketball" 1: "Baseball" 2: "Football" 3: "Footy" 4: "NFL" 5: "Volleyball" 6: "Badminton"
